DETAILED ACTION

Claims 1-5 are pending.

Receipt of the Priority Document, Information Disclosure Statement and the Preliminary amendment filed on 01/18/02 is acknowledged. The supplemental Information Disclosure Statement filed on 05/03/02 is also acknowledged and has been entered into the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly

Art Unit: 1626

owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 U.S.C. § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "residue"(claim 1) page 9, lines 7, 18 and 19 respectively is indefinite, connoting no information as to what portion of the molecule remains. It is suggested that "residue" be changed to --group--.

Regarding claims 1-5, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP. § 2173.05(d).

U.S. Patent number 5,700,947 is cited to show the state of the art.
